

Sanjan Nagar Public Education Trust Higher Secondary School

My journey at Sanjan Nagar

I got admission in Sanjan Nagar when I was 10 years old. My sisters were studying at Sanjan Nagar and both of them were doing great there. My mother was not satisfied from my studies so she decided to take me to Sanjan Nagar and after a very long struggle I was admitted to Sanjan Nagar in my fifth standard.

Sanjan Nagar was a whole different atmosphere, we learned through surveys, arts, drama/theatre, sports and research. My teachers were supportive and motivating and taught us in a way that I fell in love with learning.

I took part in many projects that helped me to groom my personality like Mathletics, Rabbtt, comic sessions with Nida Shams, visit to Toddlers academy & Scarsdale International School, Art beat (the little art), CAP (Citizen Archive Program), DNA (Discovering New Artists), Girls Guide and many others.

Through participating in different co-curricular activities I became more confident.

As the years passed, I was being promoted to higher standards, my grades were improving efficiently and so does my personality and character. I have been to two morning shows as well, one with Sahir Lodhi and other with Nadia fazal jamil. I was there to represent myself as an artist.

Through science melas, open house days, faiz festival, sports day, book fairs, and enormous other activities and events I become more confident and I began to believe in myself. I visited FC College as a participant of SEEDS OF PEACE Pakistan there I attended mock parliament and interfaith harmony camp, I also participated in DANCE 4 LIFE, which was based on providing awareness of HIV AIDS and more. I have attended many workshops with artists and I was given many opportunities to visit NCA, to Faiz Ghar, Zahur ul Akhlaq gallery, Allhamra art gallery and RM Naeem studio.

I realized in Sanjan Nagar how good I am in arts. I won many prizes at national level in arts and as reward I attended free workshops with RM Naeem And Sadaf Naeem. I met Shahziya Sikender and she provided career counseling also. I was an ordinary girl with no proper aims and targets but Sanjan Nagar helped me to explore my hidden artist. I like to do doodle art, abstract, still life, pencil sketching, origami etc.

When I completed my matriculation from Sanjan Nagar, I prefer to study here for intermediate and with the passage of time I developed interest for astronomy, astrophysics, and cosmology. I just love to study about outer space, its origin, phenomenon, wonders, and our place in the universe, existence, fate, and all the theories connecting us with cosmos.

I write articles on big bang, big bounce, big crunch, big rip, big freeze, black holes, white holes, pulsars, quasars, blazars, stars, planets, solar systems, galaxies and enormous others things. I'm also the member of LAST (Lahore Astronomical Society Team) which is working for astronomy awareness.

And now, I'm doing my bachelors in Space Sciences from Punjab University and following my passion because I want to be an astronaut, an astronaut from my homeland Pakistan.

I just want to learn more and more and I would love to spread it around through sessions and workshops.

Sanjan Nagar is a great platform for making humans not machines, a platform where the students find the purpose of their life and a platform where teachers explore the hidden talents of the students and polish them.

This school has given me the kind of confidence that changed my thinking and perspective towards my whole life, that yes, I'm not an ordinary individual, I have targets to achieve and aim to chase.

I LOVE SANJAN NAGAR!
